If you answer Yes to ASCH Membership and/or Approved Consultant, you can move to the last question on this page. If you answer No to both ASCH Member and ASCH Approved Consultant, you must provide a response to the questions below.

Yes

Are you a member of ASCH?

Are you an ASCH Approved Consultant? (Collected for Informational Purposes Only)

Yes

Please list your graduate degree in a medical or mental health care field.

PhD in Clinical Psychology

List the accredited university from which you received your graduate degree.

U of Louisville

Please list your license or certification to practice as a medical or mental health care professional.

2457

List the state or province from which you received your license.

North Carolina

Will others be presenting with you? If yes, please identify those individuals, with their credentials below.

Christina L. Vair, PhD

Proposed Presentation Details

Proposed Title

Hypnotic Treatment of Chronic Pain from a Whole Person Perspective: Hypnosis and the Whole Health Model

Abstract Description (100 Word limit)

Although clinical hypnosis can be a powerful tool in helping individuals overcome chronic pain, it is often more helpful as part of a comprehensive approach to care. The presenters, pain psychologists using clinical hypnosis in the Veterans Health Administration, will offer a model of integrated care for chronic pain based in the VHA's Whole Health approach. Incorporating mind, body, and spirit into the care of chronic pain allows veterans to recognize how their lives can be rewarding and fulfilling despite their pain. Participants will practice several techniques that they might incorporate in their own work with individuals with chronic pain.

Rate the Presentation Abstract:

Learning Objectives (Please review the Guide to Writing Meaningful Learning Objectives to ensure they meet accreditation standards.)

At the end of this presentation, participants will be able to:

1. Define eight aspects of personal wellness that can be addressed in chronic pain care.
2. Demonstrate the basics of two move-based approaches to chronic pain care.
3. Describe at least two ways that awareness of the power of hypnotic language can strengthen "non-hypnotic" intervention with chronic pain.

Friday, February 24, 2024~Saturday, February 25, 2024~Sunday, February 26, 2024

Educational Purpose

Professional Practice Gap(s)

The opioid crisis has left medical professionals desperate to help their patients with pain management strategies that don't create more problems.

Educational Needs(s)

Knowledge~Competence~Performance

Explain how this activity was designed to change competence, performance, or patient outcomes.

Participants will learn a Whole Health model of wellness and then see how it is impacted by chronic pain. In the second 90 minutes, we'll take them through discussion and demonstration of how to use the 8 areas of wellness as targets for hypnotic interventions.

Select the desirable attribute(s) this activity addresses. The list below includes the Competencies of: ACGME/ABMS, Institute of Medicine Interprofessional Education Collaborative, or you may enter other competencies recognized by your organization. Select all that apply:

Patient Care and Procedural Skills~Medical Knowledge~Quality Improvement~Interpersonal and Communication Skills~Professionalism~Systems-based Practice~Practice-Based Learning and Improvement~Provide Patient-Centered Care~Work in Interdisciplinary Teams~Employ Evidence-Based Practice~Values/Ethics for Interprofessional Practice~Interprofessional Communication~Teams and Teamwork

If the list above did not contain your attribute, please enter it here
